USRA B-MOD SHOCK PACKAGE

Dear USRA B-Mod Drivers,

2018 shock package for USRA B-Mods.

This is not the only thing that will work, we tune a shock package to your car and driving style, and then we balance the car between Rf shock, RF spring and LR drive. Here are some options for these cars.

- *RF1-50+130 @ 100 psi (7r-2c)*
- *RF1-75+130 @ 100 psi (8-2) **
- *LF1-40 @ 100 psi (5-3) **
- *LF1-50 @ 100 psi (6-3)*
- *LF1-40 @ 100 PSI (5-3) *Short Shaft*
- *RR-N @ 100 psi (5-2)*
- *RR1-40 @ 100 psi (6-2) **
- *LR1-40-350 @ 175 psi (2-7) **
- *LR1-50-400@ 225 psi (2-8)*

**indicates standard shock package (set of 5)*

Other options are more rebound in the RF to turn the car better such as RFGF-200 or bigger and different LR such as an Air Shock or a Bypass shock or even an SRT left rear shock. We can tune the package to fit you and the car to whatever level you need. Cost on a B Mod style shock package for the15 and 20 Series is $200.00 ea shock and for the Base Valve version is $275.00 ea. Remember if you want the most from your shock package you need to match it up with a good set of springs.
