STOCK CAR SHOCK PACKAGE

15 or 20 Series Shocks

Dear Stock Car Drivers,

Shock package for, Stock car.
This is not the only thing that will work, we tune a shock package to your car and driving style, and then we balance the car between Rf shock, RF spring and LR drive. Here are some options for these cars.

- *RF1-50+130 @ 100 psi (7r-2c) **
- *RF1-75+130 @ 100 psi (8-2) **
- *LF1-40 @ 100 psi (5-3)*
- *LF 185/225 @ 100 psi (3.5-4.5) **
- *RR-260/110 @ 100 psi*
- *RR1-40 @ 100 psi (6-2) **
- *LR1-40-350 @ 175 psi (2-7) * Dry*
- *LR 2060 @ 150 psi * Tacky*

Other options are more rebound in the RF to turn the car better such as RFGF-200 or bigger and different LR such as an Air Shock or a Bypass shock or even an SRT left rear shock. We can tune the package to fit you and the car to whatever level you need. Cost on a B Mod style shock package or both 15 and 20 Series is $200.00 ea shock and for the Base Valve version is $275.00 ea. Remember if you want the most from your shock package you need to match it up with a good set of springs.
